

INSTRUCTIONS & INFORMATION

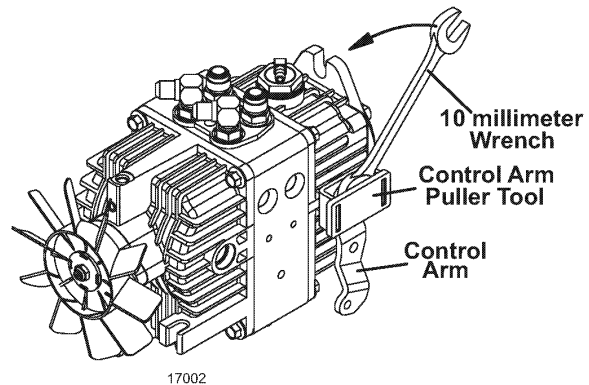

CONTROL ARM PULLER KIT

Kit Number 609013

The Control Arm Puller Kit was designed to assist in the removal of the Control Arm from the Tandem Hydro Pump

- Place the Control Arm Puller over the top of the control arm so that the trunnion shaft slides into the slot in the back of the puller.
- Insert the 10MM wrench into the puller and continue to loosen the bolt. As the bolt head contacts the inside of the puller the control arm will gradually slide off the trunnion shaft.

REMOVAL INSTRUCTIONS:

- Remove the steering linkage rod from the control arm.
- Using a 10MM wrench slightly loosen the bolt securing the control arm to the trunnion shaft.
