

INSTRUCTIONS & INFORMATION

SNOWTHROWER HOUSING PANEL KIT

Part Number 503285 48 inch auger
503286 60 inch auger

Installation Instructions

- Remove snowthrower blade from housing and discard existing carriage bolts.
- Drill one .312" diameter hole in the left side of auger housing (see illustration below).
- Locate the housing panel and slide it between the auger and housing.
- **Note: The auger may need to be loosened or removed to install the panel.**
- Bolt the bottom of the housing panel between the auger housing and the blade using the six carriage bolts provided.
- Secure the top left panel tab with a .25-20 whiz bolt through the drilled hole. The tab on the right side fits between the idler sprocket bolt head and washer and the auger housing.
- The 60" panel has a bolt tab in the center of the panel. Drill a .312" diameter hole through the tab and into the auger housing spout. Secure with a .25-20 x .5 whiz bolt.
