

INSTRUCTIONS & INFORMATION

AUXILIARY FUEL TANK KIT

Part Number 503875

Models 718, 718K, 720K, 725K, 1822 and 1822K tractors.

Installation instructions for models 718, 718K, 720K, and 725K tractors are on page 1 and 2. Installation instructions for models 1822 and 1822K tractors are on page 3.

Models 718, 718K, 720K and 725K

- Mount Auxiliary Gas Tank Mount (item 12) to left side of tractor frame securing with four .25-20 x .75 whiz bolts and nuts.
- Next mount auxiliary fuel tank and heat shield (item 15) to this mount fastening in place with mounting bracket (item 4) and two .375-16 nuts and lock washers.
- Disconnect existing fuel hose from existing fuel tank. Then connect fuel tanks using fuel hoses (item 5), straight barb fitting (item 8) and .125" tee (item 7) as shown in illustration. Secure fuel hoses with hose clamps (item 6). Route these fuel hoses directly behind the air intake duct on the engine. Then connect existing fuel hose which was disconnected from fuel tank, to the 90° barb fitting (item 9) in the .125" tee as shown in illustration. Secure hose with hose clamp.
