

# INSTRUCTIONS & INFORMATION

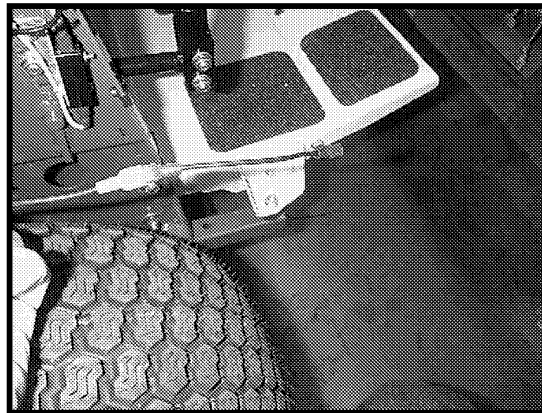

## ENCLOSURE HEATER KIT

Part Number 503295

Used on 721, 725, 725G2, 721D, 721D2, 928D2 & 932G2 Grasshopper tractors with Serial #5499999 & below.

Complete the following before installing the enclosure on the tractor. If the enclosure has already been installed, it will be necessary to remove the enclosure's right side panel to gain access to the tractor's console.

1. Remove the console's bottom panel and locate the fuse block.
2. Select an unused accessory fuse slot and insert a 7.5 amp. fuse. (See Fig. 6, page 4)  
**NOTE: If no unused slots are available, skip to step 5.**
3. Install the double four inch purple wires with fuse clip included in kit to the fuse terminal.
4. Locate the 60 inch purple wire included in kit and connect to one of the four inch purple wires.
5. Skip this step if steps 2-4 already completed. If both accessory fuse slots are being used to protect other accessories, proceed as follows. (See Fig. 7, page 4)
  - A. Locate the 60 inch purple wire included in kit and connect to the single 4" purple wire included in kit.

- B. Disconnect existing black wire at light switch. Place double tab adapter on light switch post and connect 60" purple wire to double tab adapter. Reconnect existing black wire to double tab adapter.
