

INSTRUCTIONS & INFORMATION

WIRE ASSEMBLY WIPER DISCONNECT

Part Number 603916

Used when installing enclosure with electric wiper.

IMPORTANT

Install the wiper disconnect wire assembly before installing enclosure. Refer to illustration.

- Remove the tractor's console fill panel.
- Locate the light switch in the console and disconnect the single black wire with blue female terminal (item 1).
- Connect the blue female terminal (item 1) to the double spade terminal (item 2) on the wiper disconnect wire assembly.
- Connect the double spade terminal (item 2) to the light switch where the single black wire was removed.
- Route the opposite end of the wire through the wiring hole in the tractor frame and through the hole directly below the right steering lever hole in the front panel.
- Re-install the console fill panel.
- After installing enclosure with wiper, locate the wire from the wiper. Cut wire to the desired length and crimp blue male terminal (item 3) to the wire. Connect the wiper disconnect wire assembly to the wire from the wiper. When removing enclosure disconnect wiring at this point.
